INDEX OF AUTHORS
Volume 25, 1985

A

Abdul-Aziz, G. See Lapicque, F.

Aimar, P.
A study of selective electrodialysis and the possibilities offered by coupling with electrolysis 266

Anthony, A.M. See Lapicque, F.

Arconada, A. See Galassini, G.

Aznar, M.P. See Corella, J.

B

Bae, S.Y. See Rhim, J.K.

Baiker, A.
Experimental method for the characterization of catalysts. I. Gas adsorption methods, pycnometry and *porosimetry* 16

Experimental methods for the characterization of catalysts. II. X-ray diffraction, temperature-programmed desorption and reduction, thermogravimetry and differential thermoanalysis.....30

Experimental methods for the characterization of catalysts. III. Electron microscopy, electron-probe *microanalysis, Auger electron spectroscopy, photo-*electron spectroscopy and secondary-ion mass spectroscopy *38*

Baluais, G., Dodds, J.A., and Tondeur, T.
A model for the desaturation of porous media as applied to filter cakes 436

Baumard, J.F. See Lapicque, F.

Bilbao, J. See Corella, J.

Blasinski, H. and Krauze, S.M.
A method of moments for analyzing and predicting the outlet curve for an adsorption process. I. Idealized *model for fixed bed adsorption* *182*

Bohnet, M.
Advances in the design of pneumatic conveyors ..387

Brodskii, S. Ya. See Kafarov, V.V.

C

Cales, B. See Lapicque, F.

Camacho-Rubio, F., Padial-Vico, A., and Martinez-Sancho, M.E.
The effect of the mean intensity of light on the cultivation of *Chlorella pyrenoidosa* 283

Cao, T., Merry, A.J., and Wilson, M.P.
A mathematical model for emulsion polymerization *710*

Černansky, A. and Široký, R.
Deep-bed filtration on filament layers of particles polydispersed in liquids 364

Chan, P.Q. See Yamada, I.

Charpentier, J.-C. See Darde, T.

Charpentier, J.-C. See Houzelot, J.-L.

Chatzis, I. and Dullien, F.A.L.
The modeling of mercury porosimetry and the relative permeability of mercury in sandstones using percolation theory 47

Chen, M. See Zhu, K.

Chen, Z., Li, G., Li, W., Dai, L., Niu, Y., Hu, J., Gu, J., *Mao, X., and Li, M.*
The kinetics of the oxidation of *o*-xylene 738

Corella, J., Aznar, M.P., and Bilbao, J.
Kinetics of inseparable variables in catalyst deactivation due to blockage of active centers by coke produced by a parallel reaction. Mechanism and method of data analysis 275

D

Dai, L. See Chen, Z.

Darde, T., Midoux, N., and Charpentier, J.-C.
Complex gas-liquid reactions: a contribution to the search for a modeling tool and for the prediction of selectivity 67

Deak, A., Havas, G., and Sawinsky, J.
The power requirements for anchor, ribbon and helical-screw agitators 558

Dodds, J.A. See Baluais, G.

Dullien, F.A.L. See Chatzis, I.

E

Eigenberger, G.
Dynamics and stability of chemical engineering *processes* *595*

Endo, I. See Nagamune, T.

Érdi, P.
Thermodynamics of hierarchical systems 759

F

Fuchigami, M. See Tsuge, Y.

Fujino, M., Ogata, S., and Shinohara, H.
The electric potential distribution profile in a naturally charged fluidized bed and its effects 149

Fukai, J. See Miura, T.

Furusaki, S. See Kamiyanagi, K.

Furusaki, S. See Nozaki, Y.

G

Gaddis, E.S. and Gnielinski, V.
Pressure drop in cross flow across tube bundles ... 1

Galassini, G., Arconada, A., and Labrosse, G.
A contribution to the study of convective regimes in a horizontal solar converter with modulation of the temperature of the absorbing surface 447

Georgi, H. See Winter, B.

Gnielinski, V. See Gaddis, E.S.

Gu, J. See Chen, Z.

H

Hakuta, T. See Ito, N.

Haraya, K. See Ito, N.

Havas, G. See Deák, A.

Hayashi, N. See Murase, T.

Hayashi, S. See Shirato, M.

Hiraoka, S. See Yamada, I.

Hirose, Y. and Tsuda, M.
New algorithm for solving a block-tridiagonal equation containing a singular submatrix and its application to distillation calculations 295

Holzer, K.
Wet separation of fine dusts and aerosols 223

Honda, T. See Kobayashi, M.

Hoppe, K. See Kulbe, B.

Houzelot, J.-L., Thiebaut, M.-F., Charpentier, J.-C., and Schiber, J.
Contribution to the hydrodynamic study of bubble columns 645

Hu, J. See Chen, Z.

I

Iguchi, Y. See Tsuge, Y.

Iida, T. See Shishido, I.

Imanishi, Y. See Kimura, N.

Inoue, I. See Nagamune, T.

Ishikawa, R. See Yamada, I.

Itoh, K. See Murase, T.

Ito, N., Shindo, Y., Haraya, K., Ogata, K., Hakuta, T., and Yoshitome, H.
Simulation of a reaction accompanied by separation 138

Ito, S. See Nishimura, T.

Ivanov, V.A. See Kafarov, V.V.

Iwata, M. See Murase, T.

Iwata, M. See Shirato, M.

J

Jischa, M.
Turbulent heat and mass transfer 201

Ju, D.P.
Effect of length of packing on mass transfer coefficient in a packed column 703

K

Kafarov, V.V., Ivanov, V.A., and Brodskii, S. Ya.
Recycling in chemical processes ..... 453 and 617

Kamiyanagi, K. and Furusaki, S.
Analysis of chromatography by means of transfer functions 301

Kanzawa, A. See Kobayashi, M.

Kasaoka, S., Sakata, Y., and Tong, C.
Kinetic evaluation of the reactivity of various coal chars for gasification with carbon dioxide in comparison with steam 160

Kawamura, Y. See Nishimura, T.

Kawecki, W. and Salacki, W.
The effect of inaccuracies in kinetic reaction parameter estimates on the optimal length of a tubular reactor 747

Keller, J. See Kulbe, B.

Kimura, N., Mori, H., Tomita, T., Yagi, A., and Shirato, M.
Efficiency of collection of granular-bed filters due to diffusion and direct interception 122

Kimura, N., Mori, H., Yagi, A., Imanishi, Y., and Shirato, M.
Effect of particle shape on the efficiency of collection of a granular-bed filter taking into account both diffusion and direct interception 143

Kirchner, K., Krämer, P., and Rehm, H.-J.
Absorption and oxidation of pollutants using bacterial cultures (monocultures) 428

Kneule, F.
Scale-up in the suspension of solids in agitated vessels 214

Kobayashi, M., Honda, T., and Kanzawa, A.
Numerical analysis of thermal plasma flow in a pipe 308

Kosaka, S. See Miyasugi, T.

Kotter, K., Riekert, L., and Weyland, F.
The performance of base metal oxides on ceramic carriers as catalysts for air pollution control 418

Krämer, P. See Kirchner, K.

Krauze, S.M. See Blasinski, H.

Kulbe, B., Hoppe, K., and Keller, J.
Development and application of column packings for direct heat transfer 474

Kumar, S. See Pethö, A.

L

Labrosse, G. See Galassini, G.

Lapicque, F., Lédé, J. Villermaux, J., Cales, B., Baumard, J.F., Anthony, A.M., Abdul-Aziz, G., Puechberty, D., and Ledoux, M.
Research on the production of hydrogen by direct thermal dissociation of water vapor 246

Lédé, J. See Lapicque, F.

Lee, H.T. See Rhim, J.K.

Lee, K.S., Song, J.Y., and Lee, W.K.
Adaptive control of a packed-bed reactor for the partial oxidation of n-butane to maleic anhydride. 1. Unsteady-state model and dynamics of the reactor 346
Lee, W.K. See Lee, K.S.
Ledoux, M. See Lapicque, F.
Li, G. See Chen, Z.
Li, M. See Chen, Z.
Li, W. See Chen, Z.
Loraud, J.-C. See Mekebel, S.
Lou, Q.
Modified random-search algorithm and its application in chemical engineering 730

M

Mamleev, R.A.
Modeling of turbulent mixing in two-phase dispersed liquid/liquid systems 566
Mao, X. See Chen, Z.
Martinez-Sancho, M.E. See Camacho-Rubio, F.
Masuda, T., Ogata, M., Yoshida, S., and Nishimura, Y.
Effect of heavy metals on the activity and selectivity of zeolite FCC catalysts. Part 1. Poisoning of FCC catalysts and zeolite by nickel and vanadium 340
Matsuda, A., Shirabe, N., Takahashi, F., and Munakata, T.
Absorption of steam by lithium bromide solutions at low pressure. Analysis by a model for unidirectional diffusion 489
Matsuda, T. See Shishido, I.
Matsui, S. See Yamada, I.
Matsushita, M. See Tsuge, Y.
Matsuyama, H. See Shiozaki, J.
Matsuyama, H. See Tsuge, Y.
Mekebel, S. and Loraud, J.-C.
Study of variable flow in natural gas pipelines... 258
Merry, A.J. See Cao, T.
Midoux, N. See Darde, T.
Miura, T., Fukai, J. Tanno, S., and Ohtani, S.
Effect of thermocouple sheaths on the temperature response in the thermal property measurement 324
Miyahara, T. and Takahashi, T.
Drag coefficient of a single bubble rising through a quiescent liquid 146
Miyasugi, T., Yoshioka, S., Kosaka, S., and Suzuki, A.
An experimental study of a heat-exchanger-type steam reformer with a low steam/carbon ratio. Effect of carbon deposition on the distribution of flow among the catalyst tubes and of temperature among and along the tubes 480
Miyauchi, T. See Nozaki, Y.
Miyauchi, T. See Yasui, T.
Mori, H. See Kimura, N.
Mori, H. See Yamada, I.
Mori, S. See Yamada, I.
Munakata, T. See Matsuda, A.
Murase, T., Hayashi, N., Suzuki, H., and Shirato, M.
Two-dimensional expression on a cylindrical filter element 130
Murase, T. See Shirato, M.
Murase, T., Yahashi, N., Iwata, M., Itoh, K., and Shirato, M.
Effect of a locally concentrated, repeated load on the expression of a semisolid material 534
Myers, A.
Book review of Thermische Verfahrenstechnik, by Alfons Mersmann, Springer Verlag, Heidelberg (1980) 191

N

Nagamune, T., Endo, I., and Inoue, I.
A method of optimization for successive batch-fed fermentation 668
Nishimura, T., Ito, S., Tsuboi, H., and Kawamura, Y.
Analysis of two-dimensional freezing by the finite-element method 105
Nishimura, Y. See Masuda, T.
Niu, Y. See Chen, Z.
Nozaki, Y., Furusaki, S., and Miyauchi, T.
Determination of the parameters of a fluidized bed of fine catalyst particles by gas absorption 499

O

Ogata, K. See Ito, N.
Ogata, M. See Masuda, T.
Ogata, S. See Fujino, M.
Ogawa, Y. See Shirato, M.
Ohtani, S. See Miura, T.
Ohtani, S. See Shishido, I.
O'shima, E. See Shiozaki, J.
O'shima, E. See Tsuge, Y.

P

Padial-Vico, A. See Camacho-Rubio, F.
Panaitescu, G.
Estimation of the parameters in the Wilson equation by the method of maximum likelihood 688
Peters, N.
Structure of turbulent jet diffusion flames 406
Pethö, A. and Kumar, S.
Note on a combinatorial problem for the stoichiometry of chemical reactions 767
Petrila, C. See Ungureanu, S.
Puechberty, D. See Lapicque, F.

Q

Quemeneur, F. See Schlumpf, J.P.

R

Rehm, H.-J. See Kirchner, K.

Rhim, J.K., Bae, S.Y., and Lee, H.T.
Isothermal vapor-liquid equilibrium accompanied by esterification. Ethanol-formic acid system 551

Riekert, L. See Kotter, K.

S

Sakata, Y. See Kasaoka, S.

Salacki, W. See Kawecki, W.

Sato T., Yonemoto, T., and Tadaki, T.
Multicomponent transfer in a wetted-wall column under conditions of high mass flux 113

Sawada, M. See Yamada, I.

Sawinsky, J. See Deak, A.

Schiber, J. See Houzelot, J.-L.

Schlumpf, J.P. and Quemeneur, F.
Ultrafiltration of an alkylbenzene sulfonate 240

Seichter, P.
A rapid method for calculation of viscous dissipation in a highly viscous Newtonian Liquid 754

Shi, J. See Ye, Y.

Shindo, Y. See Ito, N.

Shinohara, H. See Fujino, M.

Shiozaki, J., Matsuyama, H., Tano, K., and O'shima, E.
Fault diagnosis of chemical processes by the use of signed, directed graphs. Extension to five-range patterns of abnormality 651

Shiozaki, J. See Tsuge, Y.

Shirabe, N. See Matsuda, A.

Shirato, M., Murase, T., Iwata, M., Hayashi, N., and Ogawa, Y.
Continuous expression of a slurry in a screw press 88

Shirato, M. See Kimura, N.

Shirato, M. See Murase, T.

Shishido, I., Matsuda, T., Iida, T., and Ohtani, S.
Measurement of the distribution of the working fluid within a heat-pipe wick 334

Široký, R. See Černansky, A.

Song, J.Y. See Lee, K.S.

Stiess, M.
Survey of criteria for separations of two-component mixtures of solids 234

Suzuki, A. See Miyasugi, T.

Suzuki, H. See Murase, T.

Szarawara, J. and Tabis, B.
Multiple steady states in adiabatic reactors cooled with cooled feed shots 355

T

Tabis, B. See Szarawara, J.

Tadaki, T. See Sato, T.

Takahashi, F. See Matsuda, A.

Takahashi, T. See Miyahara, T.

Tanno, S. See Miura, T.

Tano, K. See Shiozaki, J.

The m-Cresol Research Group
A study of the kinetics of the liquid-phase oxidation *of o-xylene*.....720

Thiebaut, M.-F. See Houzelot, J.-L.

Tomita, T. See Kimura, N.

Tondeur, T. See Baluais, G.

Tong, C. See Kasaoka, S.

Tsuboi, H. See Nishimura, T.

Tsuda, M. See Hirose, Y.

Tsuge, Y., Shiozaki, J., Matsuyama, H., O'shima, E., Iguchi, Y., Fuchigami, M., and Matsushita, M.
Feasibility study of a fault-diagnosis system for chemical plants 660

Tsutsui, T. See Yasui, T.

U

Ungureanu, S. and Petrila, C.
Sensitivity analysis of a chemical reactor with respect to the control inputs.....693

V

Villermaux, J. See Lapicque, F.

W

Weyland, F. See Kotter, K.

Wicke, W.
Gerhard Damköhler—founder of chemical reaction engineering 770
Interactions between physical chemistry and chemical engineering 583

Wilson, M.P. See Cao, T.

Winter, B. and Georgi, H.
An extended crystallizer model for the sizing and optimization of crystallizer cascades 611

Y

Yagi, A. See Kimura, N.

Yahashi, N. See Murase, T.

Yamada, I., Chan, P.Q., Sawada, M., Hiraoka, S., Mori, H., and Ishikawa, R.
E^V-matrix method for solving multicomponent distillation problems which involve partial condensation and entrainment 507

Yamada, I., Mori, H., Matsui, S., Hiraoka, S., and Mori, S.
Minimum temperature of heat source necessary for multieffect distillation 527

Yan, W. See Zhu, K.

Yasui, T., Tsutsui, T., and Miyauchi, T.
Effect of particle density on the fluidity of a fluidized catalyst bed and evaluation of fluidity.....517

Ye, Y., Shi, J., and Shou, Y.
Transition in the regime of flow and the point of inflection of the rate of entrainment on a perforated *plate* 176
Yonemoto, T. See Sato, T.
Yorizane, M. See Yoshida, H.
Yoshida, H. and Yorizane, M.
Characteristics of distillation columns for azeotropic mixtures 680
Yoshida, S. See Masuda, T.
Yoshioka, S. See Miyasugi, T.
Yoshitome, H. See Ito, N.

Z

Zhou, Y. See Ye, Y.
Zhu, K., Chen, M., and Yan, W.
An engineering model of a network of multicomponent *reversible reactions* 542
